Professional Summary

MERN Stack enthusiast and frontend developer with hands-on experience building scalable web applications, multi-tenant SaaS platforms, and real-time systems. Proficient in React, Next.js, TypeScript, and TanStack Query, with a strong focus on reusable component design, performance optimization, and clean developer handoff. Actively expanding into Python, LLM integration, and AI-driven backend systems through independent project work. Eager to grow in collaborative teams with senior guidance.

Professional Experience

Junior Frontend Developer, IOXET Labs Pvt. Ltd. – Hattiban, Satdobato, Lalitpur Aug 2025 – Present

- Contributed to a monorepo-based architecture, developing and maintaining shared packages to ensure consistency and scalability across multiple applications.
- Implemented and worked within a micro-frontend architecture, enabling modular development and independent feature ownership across teams.
- Built and enhanced features for multi-tenant SaaS platforms (CRM and ERP systems), handling tenant-specific configurations and dynamic UI rendering.
- Integrated payment gateway functionalities, ensuring secure and reliable transaction flows within the application.
- Utilized TanStack Query (React Query) for efficient server-state management, including caching, synchronization, and optimized API handling.
- Collaborated closely with backend teams to integrate REST APIs, improving data consistency and application reliability.
- Applied production-grade development practices including reusable component design, code reviews, and performance-focused optimizations.

React Developer Intern, Bit Map IT Solutions (BITS) – Belchowk, Bharatpur, Chitwan Apr 2024 – Aug 2024

- Developed a role-based Library Management System with separate dashboards for Admins, Librarians, and Members.
- Implemented book reservation, borrowing and returning, borrowing history, and role-based access control.
- Integrated ElevenLabs API for voice alerts and eSewa API for payment testing.

Education

Bachelor in Information Management (BIM) | Saptagandaki Multiple Campus, Bharatpur-Chitwan 2019 – 2024

- **University:** Tribhuvan University

Projects

Gyani – AI-Powered Knowledge Management System (Ongoing) [Server](#) [Client](#)

- Implemented automated entity extraction using spaCy to identify and catalog entities (people, organizations, locations, dates) from uploaded documents and notes.
- Configured a hybrid fallback mechanism using an LLM (Groq API + Llama) to ensure accurate context analysis and multilingual document processing.
- Designed and extended PostgreSQL schemas using SQLAlchemy ORM and Alembic, adding JSONB/JSON fields for dynamic auto-tagging and metadata indexing to support real-time filtering and entity-based retrieval.
- Built RESTful API endpoints and background processing pipelines with Python (FastAPI) and Docker to handle

file ingestion and asynchronous auto-tag generation, using ARQ and Redis for job queuing.

- **Tech Stack:** Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic, Docker, spaCy, LLM API Integration (Groq/Llama), ARQ, Redis, Next.js, React

LibraryConnect – MERN Stack Library Management System

[GitHub](#)

- A role-based system with dashboards for Admins, Librarians, and Members featuring book reservation, borrowing/returning, borrowing history, and integrated voice alerts and payment testing.
- **Tech Stack:** React.js, Next.js (App Router), Tailwind CSS, Shadcn UI, Redux Toolkit, Formik, Yup, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Axios, ElevenLabs API, eSewa API

Food Hunt – MERN Stack Group Project

[GitHub](#)

- A full-stack food sustainability app inspired by Too Good To Go, enabling businesses to list surplus food at discounts and users to book them based on location.
- **Tech Stack:** React.js, Next.js (App Router), Tailwind CSS, Shadcn UI, Redux Toolkit, Formik, Yup, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Axios

Real Time Chat App

[Live](#)

- A simple real-time chat app built with the MERN stack, enabling real-time communication with a clean and intuitive interface.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, Socket.io

Post Sharing Web App

[Live](#)

- A user-friendly web platform for sharing and browsing stories with secure data management, built to explore cloud platform APIs like Firebase and Supabase.
- **Tech Stack:** React.js, Tailwind CSS, Firebase Storage, Supabase

E-Commerce App

[Live](#)

- A basic e-commerce platform developed as a college project featuring user authentication, product listings, and shopping cart functionality.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js

Technologies

Frontend Frameworks & Libraries: React.js, Next.js, TypeScript, JavaScript

State Management: Redux, Redux Toolkit, Redux Persist, TanStack Query (React Query)

UI & Styling: Tailwind CSS, Shadcn UI, Radix UI, HeroUI, GSAP, Framer Motion

Forms & Validation: Formik, Yup, Zod

Backend: Node.js, Express.js, Python, FastAPI, MongoDB, Mongoose, PostgreSQL, SQLAlchemy, Alembic, REST API, GraphQL, Socket.io, JWT, bcrypt, Multer, Nodemailer, Docker, ARQ, Redis

Cloud & BaaS: Firebase, Supabase, Appwrite

AI & APIs: Google GenAI, spaCy, LLM API Integration & Prompt Engineering (Groq/Llama), ElevenLabs API, LovableAI, V0.dev, Cursor, Claude Code, Grok

Tools & Others: Git, GitHub, npm, Axios, Fetch, Apache ECharts, React Hot Toast, Sonner, Lucide React

Certification

MERN Stack Training Program

Broadway Infosys Pvt. Ltd.

May 2025 – August 2025
